DETAIL OF ACTION

1. The drawings are objected to because there is a figure, between figures 10 and 11, labeled "FIG." without, a number and not described in the specification. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "for incremental accessing" is indefinite as to what it means by "incremental accessing" and what are accessed.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bhatia et al. (5,313,413).

Bhatia et al. discloses a fast Fourier transform (see figure A) including storing data in sequence in a memory (11), partitioning a fast Fourier transform into stage (see figure C) with the butterfly computations ordered corresponding to the sequence, and providing a redundant twiddle factor table (9) for incremental accessing.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Kozaki et al., 5,890,098.
- b. Lee et al., 6,336,936.
- c. Ireland, 5,694,347.
